

# SUBHRAMANYU DAS

Targeting assignments in Automation Testing with an organisation of high repute with 5 years of experience

## Professional Summary

- A technocrat in Automation of **Mobile Application** (Android and iOS), **WEB Application**, **Windows Application**
- Seasoned expert in **Automation Framework Development** for **web**, **Mobile**, **Desktop** platform and **Beck-end API Test**
- Considerable experience of using automation tool like **Selenium Web Driver**, **Appium**, **testNG** and **Win App Driver**
- Demonstrable Knowledge of **core Java**, **OOPS** concept, **Data Structures** and **Python**
- Proficient in setting up **DevOps** tools like **Jenkins** and build **Maven** Project
- Strong Experience in **API Testing** using **REST assured** and **POST man**
- Well versed in scripting and monitoring the **Performance/Load test** using **J Meter**
- **Automated, modified, executed, debugged and analyzed Smoke**, **Sanity** and **Regression** Test Suit
- **Developed libraries, object repositories and optimized** configurations for Automation Frameworks
- **Tracked, identified and logged** using defect management tools like **JIRA**, **ALM**, **QC**, **Bugzilla**.  
Excellence in managing in all aspects of the Software Development Life Cycle (**SDLC**) and Software Test Life Cycle (**STLC**) within the Sprint (i.e. **Agile Methodology**)
- Leveraging basic knowledge of **Data Base Testing** and **Security Testing**
- Proficient in formulating & updating test documentation such as **Test Plan**, **Test scenarios**, **Test cases** in Test Management tool

## Experience

- |   |  |
|---|--|
| <b>Global Logic India pvt ltd</b><br>2019 - Present | <b>SOFTWARE ENGINEER</b><br>Designed , Developed the test framework using selenium ,Appium and converted the manual test scripts |
| <b>Tektronix pvt ltd</b><br>2018 - 2019             | <b>SOFTWARE DESIGN ENGINEER</b><br>Responsible for the test script development in web and mobile platform                        |
| <b>Accenture Solution pvt ltd</b><br>2015 - 2018    | <b>SOFTWARE ASSOTIATE</b><br>Responsible for the test execution and web test automation  |

## Achievements

-  **SPOT AWARD 2018**  
For individual contribution in automation
-  **SPRINTER AWARD 2019**  
For outstanding Team performance

## Skills

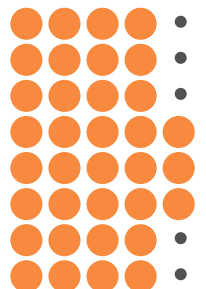

### Soft Skill

**Selenium**  
**Appium**  
**Java**  
**Python**  
**WinApp**  
**TestNg**  
**Sikuli**  
**Cucumber**

### Tools Used

**Maven**  
**Jenkin**  
**Git**  
**Jira**  
**HP-ALM**  
**Selenium IDE**  
**Eclipse**  
**POST Man**

## Hobbies and Interests

-  Painting And Sketching
-  Listening Music

## Education

### B TECH

OE, Bhubaneswar | 2010 - 2014

Electronics and Telecommunication(78.7%)

### HIGHER SECONDARY (12TH)

R.I.H.S, Baleswar | 2007 - 2009

Science

### MATRICULATION

B.N.V.P, Baleswar | 2005 - 2007

Science(PCM)

## Projects

**Global Logic India  
pvt ltd**  
2019 - Present

### GUARDIAN BOOST

- Guardian Boost is an application that connects to customer and clients and helps them to maintain data.
- It manages all the customer data and provides a dashboard view which results in customer relationship

#### Job Responsibility

- Understanding the client requirements
- Developed the Frame work for **WEB application** and **Mobile Application**(both Android and iOS) using **Appium,Selenium** and **TestNG**
- Developed and executed Automation test cases using Selenium Web Driver, TestNG and selenium web driver.
- Interacted with Dev Team to have a better understanding of functionality
- Implementation of project Specification functions in libraries
- Used GIT as a version control system and Maven as a build automation tool

**Tektronix**  
2018 - 2019

### FLUKE CONNECT

- Flukeconnect is an application that connects to different kind of industry safety tool through sensors
- It provides the user different kind of data ,ex:thermal images,vibration,temperature of the heavy industrial tools ,so that user can get the data in time and prevent mechanical failure or any accidents
- Job Responsibility
- Understanding the client requirements
- Strategied for the **Frame work development for Mobile application** with **Appium** for both Android and iOS
- Developed and executed Automation test cases using Selenium Web Driver, **TestNG** and **Appium**
- Interacted with Dev Team to have a better understanding of functionality
- Implementation of project Specification functions in libraries
- Used GIT as a version control system and Maven as a build automation tool

**Accenture**  
2015 - 2018

### HITA A ,HITOB AND HITOC

- An E-commerce web based application application that gives users to buy different kind of mobile devices and tariffs
- A Test NG framework which uses Selenium Web driver & Java used for automation of WEB application for client

#### Job Responsibility

- Understanding the client requirements.
- Developed and executed Automation test cases using Selenium Web Driver and TestNG.
- Interacted with Dev Team to have a better understanding of functionality.
- Implementation of project Specification functions in libraries.
- Used GIT as a version control system and Maven as a build automation tool.
